Assignment 15

------File Extension-------

```java
package projectMaven;

import java.io.File;

import java.util.Scanner;

import java.util.StringTokenizer;

public class FileExten {

public static String extension(String s)

{

StringTokenizer token=new
StringTokenizer(s,".");

String st1=token.nextToken();

String st2=token.nextToken();

return st2;

}

public static void main(String[] args) {

Scanner scan=new Scanner(System.in);

System.out.println("Enter the File");

String Word=scan.nextLine();
```

```
//

System.out.println("Extension:
"+FileExten.extension(Word));

}

}
```

Output:

```
Enter the File

Newfile.txt

Extension: txt
```
